Subject: Settlement of the Case Against Microsoft

I hope you drop the whole thing. If Bill Gates is smart enough to create Microsoft and become a billionaire over it, more power to him! Isn't it America where whatever you dare to believe, you can achieve? He pays BIG taxes to support you people who are suing him, and he's very generous in many humanitarian and conservation projects around the world.

Ordinary people like Microsoft just the way it has always been, not split up and a big problem like AT&T. Please, not another disaster like that.

So get over it and leave Microsoft alone!
